SMART AMERIHOMETM TO REVOLUTIONIZE GULF COAST LIVING

Hurricane Resistant Home to Be Displayed at Moody Gardens

Smart Holdings, LLC of Houston, New Orleans and Holland is pleased to have on display this weekend and throughout next week at Moody Gardens, Galveston, Texas the most practical, economical, and green solution to housing and emergency housing. Besides floating capacity, the AmerihomeTM can generate carbon tax credits and help pay for itself.

When designed for emergency housing, the AmerihomeTM can withstand hurricane force winds up to 170mph and float with rising waters from storm surge. The units can be stacked up to 3 floors and are installed “plug & play” at the rate of 20 per day. With an R value of 24 and when incorporating beneficial tax credits for solar power, the unit is capable of returning up to 60% of the acquisition cost to the purchaser. Because the unit lasts up to 100 years, it is fully recyclable.

According to Smart Holdings, the manufacture of the AmerihomeTM in Texas and Louisiana will bring strong economic development, jobs, and pride to the Gulf Coast. For more information, contact Phil C. Nugent, Manager, Smart Holdings, LLC, at (504) 234-2158.
